

ing her wan hand, the same stern man—
"Oh! I tell him I blessed
him with my best love."
A bright light shone on the picture,
and a gentle breeze—yes, tears—were
moving down Pringle's cheeks, and "blessed
be his name." When he raised
his head again—"Time alone was with him."
"Oh! I see it all—now; but was
there not much more for me? I had loved
Ellen fondly—oh! so fondly. I had
worked with but one aim—to make her
my wife; and then that with no reason,
should part us. Spirit, it was hard to bear;
it blighted all my better feelings."
Time moved his hand and a voice said—
"WENTWORTH IS AN EXCELLENT YOUNG
MAN, BUT A MAN OF STRONG FEELING;
SUCH A BLOW TO HIS HOPES, AS HE IS
ENTERING INTO LIFE WILL DO HIM INCAL-
CULABLE MISCHIEF."

"Who was that?"—"Aye, who was
that?" the Spirit answers, "and with the
knowledge of what emitters your own life,
you would so crush and blight another's—
Where was the recollection of your early
days and early love, when you so coldly en-
deavored to destroy the happy hopes of
your orphan niece! From around me how
many evils come! Had you assisted that
ruined man—"

"Assisted the man who had so ill used
me?" answered Pringle, "and broken the
heart of my loved letter than life?"
"Aye," replied the spirit. "And you re-
membered the lessons learnt at your moth-
er's knees, the precepts she taught you from
the holy book—to return good for evil—
how different would you be now! What is
the agony of reflection! Not the recollection
of your trials—they are past, and it is
but a sigh they cost you for what you suf-
fered then; but the knowledge of having done
wrong, the burden of an uneasy con-
science—it is this which is too much to bear—
it is this which causes men to drown
thought, to endeavor to erase the painful
memory of the past. But it will come;
some chord is touched which restores it with
the freshness of yesterday; and then what
would they give for the years which I have
borne away—away, never to come again?
How differently would they act, then; and
so you are thinking now. Vain is such
thought. Employ me well while I remain
with you; redeem in some measure, the
errors of the past, and peace will yet come
to you, for he is gentle and forgiving."

With bowed head, Pringle had listened to
the Spirit's words. At their conclusion the
church clock loudly proclaimed the hour.
(Concluded to-morrow)

The Daily News

NEWPORT,
144 Thames Street.
FRIDAY MORNING, JAN. 23, 1887.

E. TOURJEE, Esq., is hereby authorized
to transact for us any business connected
with the News and Journal office, of this
city.

The following tables from the report of
the Commissioner of Common Schools will be
perused with interest.

1. The number in the ages of six and fifteen, 30,143 children in the State.
2. The number in school under sixteen, 25,100.
3. The number in school over fifteen, 5,043.
4. And the whole number due at school is 35,143.
5. The whole number of all ages registered as belonging to the schools is 27,191.
6. The number attending private schools or Academies is 2,690.
7. The average attendance at the public schools is 19,339.
8. The number reported as habitually absent from all schools is 6,855.
9. The number unable to attend school is 332.
10. The percentage of scholars enrolled in the schools compared with the whole number due at schools is 75.
11. And the actual loss percent. from Antislavery is 25.
12. The percentage of all scholars attending public and private schools is 53.
13. The percentage of education actually given by the public schools is 74.
14. And the percentage of all the education received in the State is 61.
15. The percentage of children growing up in ignorance in our midst is 22.
16. The percentage of attendance compared with the number enrolled is 71.
17. And the loss from irregular attendance is 29 per cent.
18. The amount of school privileges as compared with the number of children is 62.
19. And the loss from all causes is 38 per cent.

From the same source we extract the following.

"Perhaps no people on the globe can so universally read and write as those of New England; and there is not a single school on the island. All children are taught at home, and well taught in all the elements of knowledge. But there is a great lack among them of that enterprise and invention which educating children together always produces. While therefore no education is excellent, the child suffers a loss who is confined to it; and the community suffers a still greater loss. On the contrary, it must not be forgotten, that the child who receives no home education, or no encouragement to his school work, and duties, is still more the sufferer, and still more to be compassionated."

"But to him who can read well, other words, and ages are open and radiant with light. Men of all time come and instruct him. The intellectual treasures of nations east and west flow into his lap. The beautiful languages and visions of all climes rise through his mind, and he is a man. A thousand minds—the goodliest of his own generation—are busy at work to please and instruct him. The printing press—so like the Prophet's vision of the wheels filled with eyes, in which was the spirit of the living creatures—brings to him daily the knowledge of all contemporaneous things. The dignities of heaven too, can be traced through the stars and planets, and the better land, and finds a new heaven and new earth, every where coming down to the stars to bless him. Every thing is a revelation to him, and he is a man. Air and water, earth and fire, are his delight."

are his companions and playfellows, his kindred and brothers. All things are to him servants, good and true, kind and benevolent, and minister to his wants and comfort, as do the angels to infant innocence.

Deliberately to deprive a man of such high prerogatives and enjoyments, is not less cruel than the murder of his body. Is it any less a crime to deprive him of his reason, than to deprive him of his life? The guilt may be less, and it may be as great. But are not the consequences to the individual so ruined and depraved, and the results to the community equally fatal whether it is malice aforethought, or neglect that blots the golden days through which he might have entered into a new life?

From the report of the Light-house Board at Washington, we select the following items:

"Notwithstanding the extraordinary severity of the past winter, and the consequent injury done to the lights and light-vessels by the masses of floating ice on the coast from the capes of Virginia to the eastern boundary, it is believed but little serious inconvenience resulted to navigation on account of the temporary absence at times of these aids from their proper stations."

In the first district, embracing all the navigable waters of Maine and New Hampshire, all the new Light-houses have been erected for which appropriations were made except a few, for the sites of which titles have not yet been obtained.

In the second district—all the season and navigable waters of Massachusetts—the work contemplated has been accomplished. The report says, "The Light-house at Brant Point, Nantucket, at Egg Rock, and at the Narrows, and the Point Alderion Bar Beacon, Boston bay, have been completed."

About 400 buoys have been placed during the last year to mark obstructions or serve as guides to channels.

"New illuminating apparatus has been placed in the three beacons at Nantucket, at Hyannis harbor, Mayo's Beach, Newburyport, Bird Island, and Boston Light-houses."

The difficult and important work at Minot's Ledge has been prosecuted with zeal and ability during the year.

In reference to the Northern or Rhode Island portion of the third Light-house district the report speaks as follows—
"In the northern or Rhode Island portion of the third Light-house district, the following work has been executed during the past year—
A granite light-house tower, and a dwelling for the keeper, have been built at Beaver Tail, at the entrance of Narragansett bay. A lens apparatus of the third order of Fresnel has been placed in this tower, and the light will be exhibited on a early day in place of the old light at that place."

A keeper's dwelling is in course of construction at the Lime Rock light station. Important repairs have been made on the light-vessel at Goat Island light-house and at the Fort Wolcott wharf. A new light-house tower is in course of erection at Narragansett Point, which will be completed before the close of the present season. New lens apparatus has been placed in the Warwick Neck, Prudence Island, and Sandy Point light-houses."

REPORT OF THE RELIEF SOCIETY.—The distributing Committee present the following report for their doings for the year 1886.

Amount of money collected from all sources, \$586 78.
Number of Families visited and relieved, 263, of which 163 were Americans,
55 " Colored,
81 " Irish,
26 " English,
1 French.

All of this number were visited by the committee and their necessities ascertained. About one half the whole number were relieved twice, and about one-third, three times. The Committee are of the opinion that at the present time (although the winter has been very severe) there are some reasons for the better condition of the working classes. The factories have given employment to a large number that were without means of support last winter, and we think there is no sufficient destitution to warrant this Society in making a call upon the citizens. The few cases of real suffering that exist may be better relieved by individual charity. Should the winter continue severe and cases of suffering increase, we should recommend the Society being called together.

MARSHALL C. SLOCUM.
FRANCIS LAWTON,
SAMUEL EWING.

GEORGE W. BOWEN, Pres. Relief Soc'y.

The above report is published that those who are interested in the Society may be informed how their donations have been expended.

Geo. W. Bowen, Pres't.

A copy of the New York Herald for Tuesday was laid on our table yesterday, but too late for to day's use. Our thanks to W. J. Munroe Esq. for the favor.

With commendable zeal, the stage made two attempts yesterday to leave us to ourselves, but was obliged to give up as a bad bargain.

The prospect is, therefore, that we shall hold our own,—giving out no more than we receive.

We challenge the production of a better bar or than Newport affords. Accessible from opposite directions—twenty fathoms of water over a circle of at least three miles in diameter, and sixteen feet up to any of the shores—good anchorage—freedom from ice—no wind—no rain—no snow—no fog—no lightning—no storm.

Stormy yesterday till 4 p. m. when the wind subsided and the sun once more smiled upon us.

The only mails received here since Saturday evening were those from Newport and New Bedford. The Newport mail was the first to arrive reaching the office in this city on Tuesday evening at 7 1/2 o'clock. Mr. Thurston the stage driver left Newport about 8 or 9 o'clock Tuesday morning with mails for P. River, Providence Boston and New York in a sleigh. After proceeding 2 or 3 miles he let his horse and sleigh procure a small hand sled on which to put the mail and then started on foot, reaching the Te House about noon where he took dinner and reached this city at 7 1/2 o'clock in the evening. This is the only instance of energy on the part of Mr. Thurston in the discharge of his duties. Three years ago, December 29th 1883, when travel was interrupted by a similar storm the mail from New Bedford was the only one that arrived during the day at this office, and that was brought from Sandford corner by Mr. Thurston on his back. Mr. T. is possessed of decidedly good legs. Such energy and perseverance is deserving not only of the favorable consideration and regard of his employer and the public, but of a handsome pension from Uncle Sam to whose interest he has been so faithful. We go by all means for placing Mr. Thurston on the Pension List.—Fall River News.

"Crow, I want to ax you a nut dram."
"Well, Julius, succeed; Ise open for the question."
"Can you tell me why de art of self defence an like a ribber at low tide?"
"No Julius, I dose'nt see no similarity in de two subjects, so darfor I gaves it up."
"Well, I'll tell you. Its simply becuse it develops de muscles! You ar de most ignorant nigger I nether seed in all my life."
"Yah, yah! I knowed all de time what dat was, I didnt want to say nuttin! Jis ax me agin and see if I cant tell you."

The Berlin journals state that a manuscript of about one hundred pages, of the philosopher Kant, which has hitherto remained unknown, has just been discovered in that city. They also state that attempts are to be made in the Royal Library to photograph old manuscripts.

SHIPBUILDING IN MAINE.—During the year 1886, there were built in the Bath district forty-two ships five bargues, one brig, seven schooners, and eight boats—total, sixty-three vessels, with an aggregate of 30,850 tons. In the Bangor district, forty-seven ships, four bargues, six brigs, seven schooners, one steamer, and seven boats—total seventy-two vessels and with an aggregate of 60,000 tons.

DR. HAYES of Philadelphia, who was Dr. Kane's surgeon in the Arctic expedition is said to have a most capital lecture giving a graphic and original account of that expedition. We should prefer him to the class of lecturers, of which the supply seems daily equal to the demand.

From India.

Extract of a letter received from Rev. B. C. Thomas.

TAYOR, November 18th, 1886.—MISSUS P. DAVIS, New Bedford.—The Karens here have no more confidence in their successors. They desire natural remedies for the sick. My various means, principally through the agency of the Rev. D. L. Brayton, these Karens people have become acquainted with your medicines, and their demand for it is to me very surprising.

I have now by me orders for more than fifty bottles, but I have not got one bottle; I therefore wish you to send me a quantity. I could dispose of at least one hundred bottles this year. Send it, and I will pay you through the Treasurer of the Missionary Union. I hope we shall be favored with some gift as soon as possible. There is no medicine which stands so high in the estimation of the Karens of these provinces as the Pain Killer, and I feel willing to gratify them, as I entertain a very high opinion of its worth. B. C. THOMAS.

MISSUS PRINCE DAVIS & SON.—Dear Sir.—Concerning our respects of the 4th ult. (duplicate herewith) I find it necessary to address you again, as my most sanguine expectations have been more than realized. The call for your valuable medicine is increasing so very rapidly that I fear I shall soon be unable to keep pace with it, as I have only about one hundred bottles of the supply per Union to hand, and trust that ere this you will have dispatched my order of June last. My particular object in writing you is to beg that on receipt of this, and by first direct opportunity offering immediately after, you will kindly dispatch another batch as ordered in my letter of June last. I hope, however, I will not be entirely out before your last dispatch reaches me, of which, however, I have not yet heard from you. I remain, dear sir, yours sincerely, J. L. GARRAU. Sold by all dealers in medicine.

ANOTHER TRIUMPH OF THE
Defiance Salamander. Sales!!!

MR. ROBT. M. PATRICK, 102 Pearl St.

DEAR SIR.—The Defiance Sale, No. 5,772, purchased from you about eighteen months since, was in my house at Newport, R. I., which, with the furniture, was entirely destroyed by fire on the night of 5th June last. The safe, after being exposed to an intense heat for many hours, was recovered on the 10th inst. and the contents were found to be in perfect order, and in fact, as when it was opened, the same had stood just as when recovered, until shipped to your address, Nov. 1st. When opened at your store this morning, I was agreeably surprised, as were also others present, to find the contents, consisting of valuable silver plate, &c., in as perfect order as when placed there. It is with pleasure I add my testimony to the merits of the Safes of your manufacture. Yours, Respectfully, DANIEL PARISH.

A CARD TO THE LADIES.

DR. DUNN'S Golden Periodical Pills for Females. Perfectly harmless, yet wonderfully and powerfully efficacious in correcting, regulating, and removing all obstructions from whatever cause.

All medical men know, as well as many others, that no female can enjoy good health, unless she is regular; and whenever in disorder, cold, or any other cause, the general health begins immediately to decline, and the want of such a remedy has been the cause of so many consumptions among young females. Headache, Pain in the Side, Palpitation of the Heart, Loathing of Food, and Disordered Sleep, are most always a sign from the interruption of nature; and whenever that is the case, the Pills will invariably remedy all these evils; and may always be used successfully as a preventive. For sale by RAZARD & CASWELL, 12 Washington Square, and 137 Thames St. They will supply the trade at manufacturers' prices. Ladies, by enclosing \$1.00 to STURGES & CO., Box 24, Newport Post Office, can have the Pills sent (confidentially) by mail to any part of the city or country.

MARINE INTELLIGENCE.

PORT OF NEWPORT.

ARRIVED.

Thursday, Jan. 22

Bark Pilgrim, Andrews, Noddy, for Prov. and New Bedford; Sander, Charleston, for Prov.

Schooner—Popplers, Petrel, Manchester, for New Bedford.

PROVIDENCE MARKET.

For the week ending Jan. 13.

Wool.—Fleeces, 42 a 60c; pulled, 30 a 52 1/2; Foreign, 30c.

PRINTING CLOTHS, 5 3/4 a 5 5/8c.

AMBER, Pat. 8 3/4. Pearl, 8 3/4.

CANDLES—Patent wax, 50 a 52c; Sperm, city, 34 a 40c; Stearine, 28 a 30c; Mould, 15 a 13 1/2c.

DUNCAN AND DYER.—Alcohol, 70c; 70 a 75; Am. 2 1/4 a 3c; Copernic, 1 1/4 a 1 1/2c.
